Sanitary fittings | designed for the highest demand

KEMMLIT®

Quality | leads to success

Our company philosophy

Our strong commitment to provide products of the highest quality and design has made us the market leader. When it comes to the product, development or service, our clients profit from our top quality performance. After all, sanitary facilities which live up to the highest of standards and which are characterized by cleanliness and functional reliability reflect positively on a customers' business.

For over five decades we have continually strived to offer our customers superior and innovative solutions. We have achieved this with our combination of Swabian solidity, inventive spirit and innovation. Highly modern manufacturing techniques, rigorous quality controls and the utilisation of high quality materials have resulted in the crea-tion of high standard sanitary appliances. Our aim is to offer our customers the best possible solutions. Individual consultation from well trained experts and customer-specific precision work carried out by experienced engineers is just as important as is the provision of an extensive product range that fulfils every requirement.

As the market leader, we give our customers a feeling of security. This is proven by the extensive management and development skills that we demonstrate in projects of all sizes.

We have decades of experience and we always strictly adhere to assembly delivery dates, providing outstanding quality time and time again.

We build | to last

Outstanding product quality

Quality pays off!
All sanitary facilities are subject to significant stresses. The durable and distinguished sanitary facilities offered by KEMMLIT do not only save money, but also prevent many other problems including those created by the closure of sanitary areas caused by essential renovation.

This is why we only utilise high quality materials in our products, for example aluminum alloys, which depending on use, are also given an additional coating and panel material made exclusively by prominent manufacturers.

Additionally, the close co-operation with our partners guarantees quality and reliability.
Our ultra-modern production and rigorous quality controls are further characteristic KEMMLIT qualities which have led to us being certified annually by the German Technical Inspection Association TÜV.

We carry out extensive function and wear-and-tear tests in our laboratory. Every one of our products must pass a meticulous final check.

The exceptional standard of our products and our sanitary facilities is therefore no coincidence. It is the result of a consistent and implemented philosophy of quality, pursued over years.

Whatever KEMMLIT product you decide upon you can rely on lasting product quality and design.

Our Ideas | your advantage

Innovation gained by experience

"Finding the best solutions for our customers." This slogan has always motivated us in our search for new solutions.
Our engineers work closely together with renowned architects in the development of products. We were the first company to introduce aluminum partitions.

We have made our mark with innovative secure solutions for staff and cloakroom cupboards, with easy-to-clean suspended constructions and sophisticated security solutions in our Kindergarten product range. The German Technical Inspection Association TÜV has also recognized the significant contribution that we have made to the market.

Our "floating" partition wall system NOXX was commended for its innovative construction and for its unique design, with the Innovation Award for Architecture and Building and iF Product Design Award.

In terms of quality, technology and design KEMMLIT solutions are always a step ahead of the rest.

And what also makes us unique is our customer-specific production. We only start manufacturing once our specialist advisors have taken measurements and once you have received a specially tailored solution to meet your needs.

Additionally, we have set new standards in the sanitary sector with our range of complete solutions for sanitary facilities; from sinks to cupboards, doors to partition walls and hook rails, all coordinated in terms of design and colour scheme.

These accomplishments are made possible through innovative production processes and through customer-orientated corporate organization. Only the direct contact to you the customer inspires us with new ideas from which you can benefit.

We are there | when you need us

Know-How and service for every eventuality

Maximum quality at KEMMLIT refers in particular to consultation and service.

With KEMMLIT you have the largest specialist consultant network for sanitary facilities in Germany at your disposal. One call suffices and we will be at your door by the next day.

You will also receive a quotation within one working day. Our experts will provide you with comprehensive and competent information about our products and about the options available to you for efficiently planning your sanitary facilities.

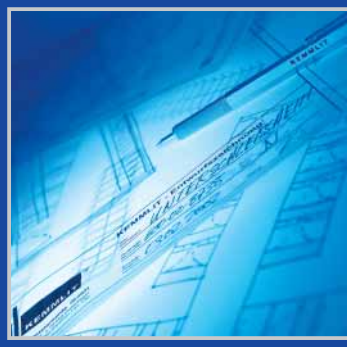

In the process, legal regulations and experience gained from other past projects is taken into account. During assembly, KEMMLIT leaves nothing to chance. Skilled personnel that have been intensively trained through our plant, assemble our products to the highest quality and with absolute precision.

Should you require a unique form of service or customer support, our assembly technicians will be available at once to assist with all their expertise.

Both our consultants and our assembly technicians are continually being trained and given advanced qualifications at our KEMMLIT Training Centre.

Only cutting-edge know-how can guarantee our customers consultation and service of the highest level.

Unique projects

Every KEMMLIT sanitary solution is something special. Like every customer, you have your own individual requirements and ideas and we integrate these in our solutions right from the very start.

Whether you are looking for a solution for a recreational pool or for a small WC cubicle system, our consultants take time to properly understand your requirements. This then enables them to plan together with you a sanitary facility of the highest standard.

In the process you will be supported by specialists and planning engineers. The result is your own entirely personal sanitary facility.

After you have approved the draft, we manufacture your tailor-made sanitary solution in our modern plant.

At the same time constant quality control secures the highest quality standards.

In conclusion, our specially trained team, professionally assembles your sanitary solution.

After testing and approval you will know for sure that you are in capable hands with KEMMLIT and what is more, for the long-term.
