Wardrobe lockers IXOS P with attached bench seating at the swimming pool „Sonnenbad“, Schwarzenberg

IXOS® P Sturdy and long-lasting

The customised locker system IXOS P consists of solid grade HPL panels, which are connected with special aluminium profiles and are assembled on site with an innovative plug-in arrangement. Water resistance and ease of cleaning as well as high resistance to impact, breakage and scratching help distinguish this product in particular.

Two different door options can be chosen: doors made of 13 mm thick HPL or as an alternative in 8 mm thick toughened safety glass. Special colours and individual digital prints are available on request. The glass doors are attached via special clamping profiles made of satin anodised aluminium. It features solid fittings such as hinges and door opening restraints made of stainless steel as well as standard protection against break-in. These guarantee reliable functioning, even under the toughest conditions. Attached bench seating, sloping tops or special ventilation systems widen the area of application for IXOS P.

Wardrobe locker type R in special colours

Typ R Wet area solution

The locker carcass consists of environmentally friendly, easy to clean and sea-water resistant aluminium. The high quality aluminium is corrosion resistant even at the cut edges. The locker system is TÜV and GS (safety tested) certified. Type R is ideally suited for personnel, wardrobe and deposit box lockers as well as lockers for valuables. Two different door options are available: doors made of 13 mm HPL with bevelled edges to prevent injuries or as an alternative made of 15 mm thick aluminium. The aluminium doors are enamelled with the scratch-resistant surface Crystal Coat.

Personnel lockers type S in special colours with electronic locks

Typ S Low-budget solution

The customised locker solution type S is made of sheet steel with scratch and abrasion resistant stoved enamel finish. Due to galvanisation with aluminium components the lockers offer increased corrosion resistance. This KEMMLIT locker system has also been TÜV certified. Type S is the solution which is particularly good value for money for individual and long-lasting locker systems.

Two different door options are also available: doors made of 13 mm HPL with bevelled edges to prevent injuries or as an alternative made of 15 mm thick sheet steel with scratch-resistant surface.

Double-tier locker IXOS P with shoe tray, shoe rack and clothes rail

KEMMLIT Personnel lockers

Whether in the chemical, processing or food industry, requirements are diverse and demanding, hence bespoke and individual solutions are essential. Personnel lockers are generally allocated to individual employees. The separation of work and casual clothes is sometimes mandatory within some companies. KEMMLIT provides proven solutions for this requirement: not only double-lockers with combined lock to separate clothes.

Creative individual solutions can also help under these circumstances. For instance we have developed a “bike-model” personnel locker with a hook for the helmet, pull-out towel holder, deodorant and shampoo shelf and a shoe tray – for all environmentally conscious employees, who use their bike to get to work. Our local representative will gladly help you find the suitable locker.

KEMMLIT Wardrobe lockers

The wardrobe lockers for swimming pools, saunas, gyms or leisure centres can also be tailored to suit the user's requirements including height, width and depth. Along with special requirements regarding wet area suitability and break-in resistance, individual interior fittings such as top hooks, hat shelves or ventilation systems are of particular importance.

Z-shaped lockers are a frequently selected construction in order to save space but still offer the user the possibility to hang long articles of clothing without wrinkling. It is also possible to combine Z-shaped lockers with regular locking systems.

Lockers type R at the Beckenham Spa, London

KEMMLIT Deposit box lockers

The shapely deposit box lockers offer vandal resistant compartments with increased break-in resistance due to special security pins, projecting door profiles and further refined details, so all things of value remain under lock and key. All locking systems, ranging from cam locks to coin return or retain locks, are available.

Our project engineers implement variable compartment sizes and arrangements, dependent on the items stored combined with the individual interior fittings, as well as project specific colour concepts according to individual requirements.

KEMMLIT Lockers for valuables

The lockers for valuables have been designed by KEMMLIT for swimming pools and leisure parks and can be ideally combined with wardrobe and deposit box lockers. The lockers for valuables by KEMMLIT are space-saving, very solid as well as visually pleasing.

The small units offer the user a safe place for small, valuable items in a confined space. Due to the solid carcass, the stainless steel hinges and the robust doors, these lockers are breake-in resistant.

Lockers for valuables and wardrobe lockers IXOS P at the swimming pool in Heringen

Locker systems Examples for fittings

Studded base made of sheet metal, or HPL without studs

Grated base and supporting stand made of aluminium

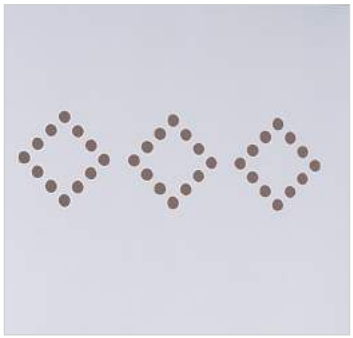

Perforated sheet metal base, for HPL with drilled holes

Door opening restraint (90°) made of stainless steel

Hat shelf made of sheet metal or HPL with double hooks

Ventilation perforation rhombus shaped in the back panel

Safety pin and eyelet for break-in resistance

Number plate or engraved numbers for HPL doors

Coin return lock

Ticket / coin return or retain lock

Electronic locking system

Bench cube made of 13 mm HPL in traffic white 9317, plinth in graphite 7808

Bench seating U-shaped made of HPL with aluminium supporting legs

Bench seating type U1, model no. 5210 with shoe rack

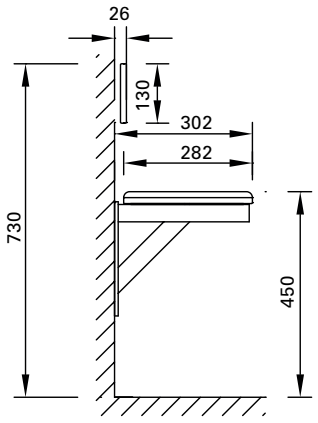

Locker system IXOS P with attached/ pull-out bench seating

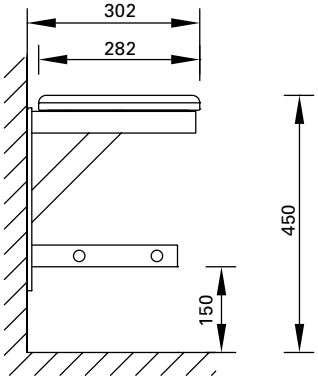

KEMMLIT Benches

KEMMLIT bench seating distinguishes itself by it's high quality, stability and longevity. The conventional wardrobe bench seating systems with bench seat top and supporting stand can be applied in both dry and wet areas. The bench seat top consists of solid grade HPL panels with additional overlay. Combined with the brackets and supports made of satin anodised aluminium this ensures a solid and extremely durable bench seat. On request the bench seating is also available with safety peg rail made of round aluminium profiles. The safety three-in-one hooks are made of aluminium as well. Available as an exclusive alternative is the bench cube made of 13 mm solid grade HPL with black core. The bench cube consists of a carcass that is closed all around. The plinth is 50 mm high.

Bench cube made of HPL

KEMMLIT Shelves and hairdryer stations

Shelves made by KEMMLIT are available made of either HPL or of toughened safety glass. Shelves made of solid grade HPL are 13 mm thick. HPL is extremely water-, scratch- and decoy-resistant, anti-bacterial and also resistant to chemicals. Shelves made of 10 mm thick toughened safety glass are supremely sturdy, scratch-resistant and easy to clean.

They can either be created with satin, structured finish or colour enamelled. The smoothed edges look elegant and protect against injuries. The shelves are custom made and can be done with or without a back panel.

Mounting to the wall with brackets, on builder`s plinth or with supporting legs are all possible. All corners and edges are rounded or bevelled to prevent injuries. On request the shelves can also be provided with doors and locks.

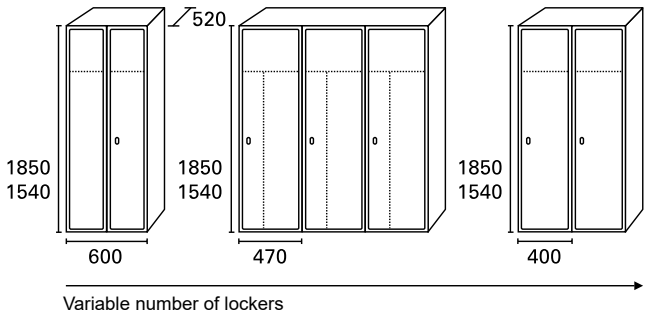

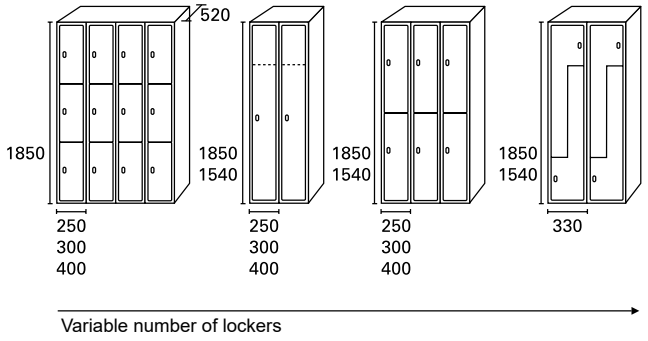

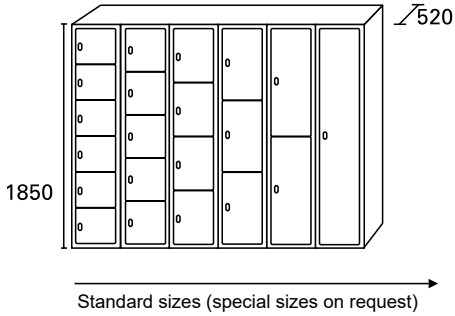

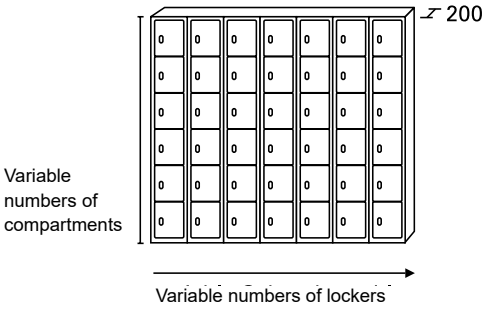

Made-to-measure hairdryer stations in conjunction with mirrors offer a wide range of design options. Hairdryer stations made from solid grade HPL are extremely robust and ideally suited to withstand heavy everyday use in fitness centres, sports centres and swimming pools.
